

## ***Integrated Management System Policy Health, Safety, Environment and Quality***

Opmar Serviços Marítimos Ltda, situated at Macaé, an Offshore Maritime Transportation Company to support Oil & Gas Operations in Brazil, has established a Integrated Management System Policy focused on the attendance of expectations of interested parts and on Quality of Services, Health and Safety at Work and Environmental Management commitments. Opmar bases its QHS&E MS as follow:

To promote continuous improvement on services, stimulating human being capabilities development, assuring an adequate management of its system, making sure the client is totally satisfied with the reliability of our process.

To transmit to all interested the reliability of a partner with an organization capable to respond to their demands and always focused on the fulfilment of the legal and other applicable requirements.

To make each employee responsible for the prevention, protection of the environment and improvement of quality on the work site, assuring their involvement on the identification and assessment of hazards and risks and aspects and impacts, as well as the identification of opportunities of improvements throughout the company.

To assure hygiene, safety and health to all employees ensuring their formation to accident and occupational illness prevention and the continuous improvement of QHS&E Management System.

To interact with the society to establish a relationship of social responsibility committed to the prevention of pollution and environmental preservation.
