

# Wellness Resources

# CHOUEST GROUP HEALTH

# Wellbeing is more than just being physically fit.

Invest in your total wellbeing by taking steps towards a happier and healthier lifestyle by working at all areas of wellbeing while at work, at home, and in your communities.

Being **physically well** means having good health, and enough energy to do what you want to every day. With thriving physical wellbeing, you will look better, feel better, and live longer.

**Social wellbeing** is defined as having strong relationships and love in your life. **Emotional wellbeing** means having good health and enough mental energy to get important things done every day.

Employees enrolled in the medical plan have access to several resources for wellness and preventative care services covered at 100%. There are tobacco cessation drugs programs, weight loss programs, discounted gym memberships, and so much more.

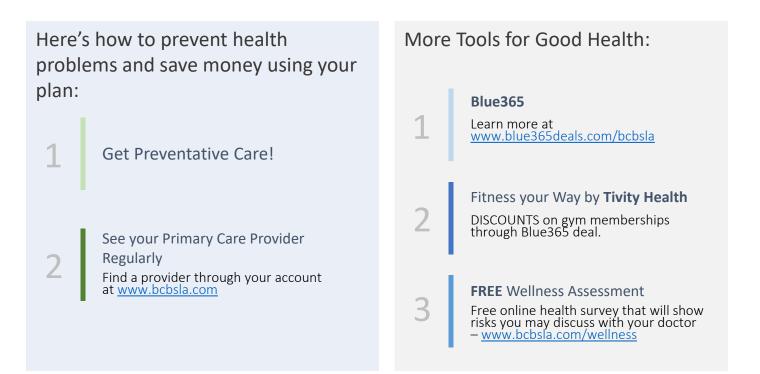

Employees not enrolled in the plan can also take advantage of wellness benefits. These websites offer resources and wellness programs to employees. Smokefree.gov Cdc.gov/healthyweight Gallagherwellbeing.com

### **Preventative Benefits**

We want to help you protect your health, and that starts with disease prevention and early detection. Preventative screenings are an important way to track your health.

# If you use a provider in your network, you can receive certain routine preventive services at no extra cost to you.

### **Quality Blue Primary Care**

We work with primary care doctors around the state to help you get the best care possible through a program called Quality Blue Primary Care. If your plan has copayments for primary care office visits, you may be able to pay less when you visit a Quality Blue Primary Care doctor.

Look up your doctor's name in our directory to see if there is a blue [Q] next to their names <u>www.bcbsla.com/findcare</u>

# 2024 Adult Wellness Guidelines

#### Adult Health – For Ages 18 and Over

Preventative care is very important for adults. By making healthier choices, you can improve your overall health and well-being. Some of these positive choices include:

- Eating a healthy diet
- Participating in regular physical activity
- Not using tobacco products
- Limiting alcohol use
- Striving for a health weight
- Taking medications as prescribed by your doctor

Adult recommendations for screenings						
Physical Exam	Every year or as directed by your doctor					
Body Mass Index (BMI)	Every year					
Blood Pressure (BP)	At least every two years					
Colon Cancer Screening	Screening colonoscopy beginning at age 45 in consultation with your doctor. You have three options for colon cancer screening: a colonoscopy every 10 yeas, a flexible sigmoidoscopy every five years or a blood test annually.					
Diabetes Screening	Beginning at age 45 (If you have high blood pressure or high cholesterol, are overweight or have a close family history of diabetes, you should consider an earlier screening.					
Lung Cancer Screening	For high-risk individuals (Talk with your doctor.)

# 2024 Adult Wellness Guidelines

#### Adult Health – For Ages 18 and Over

Adult recommendations for immunizations								
	19-21     22-26     27-29     50-64     65 and older       years     years     years     older							
Hepatitis A**	Two or three doses for at-risk adults***							
Hepatitis B**	Three doses for at-risk adults***							
Meningitis**	One to three doses depending on indication***							
Haemophilus Influenzae Type b (Hib)*	One or three doses depending on health risks***							

\*Recommendations for most adults. \*\*Recommended for adults with certain health risks. \*\*\*Discuss with your doctor to determine if and when you should get this vaccine.

#### Women's Health

Women have unique health care needs. To stay well, they should make regular screenings a priority. Women should discuss the recommendations listed on the chart below with their doctors.

Women's recommendations					
Mammogram	Every year for women, beginning at age 40*				
Cholesterol	Ages 30 – 35 if at high risk, all women ages 45 and over				
Pap Test	Pap test every three years for women ages 21 – 65, or Pap test and HPV test every five years for women ages 30 – 65. (women who have had a hysterectomy or are over age 65 may not need a Pap test)*				
Osteoporosis Screening	Beginning at age 65 or at age 60 if risk factors are present*				
Aspirin Use	At ages 50 – 79 (Talk with your doctor about the benefits and risks of aspirin use.)				
Pelvic Exam	Every year for ages 21 and over*				

#### **Men's Health**

Men are encouraged to get yearly wellness exams, even if they don't have symptoms. Engage in a healthy lifestyle and complete recommended preventative care services.

Men's recommendations	
Cholesterol	Ages 20-35 if at high risk, all men ages 35 and over
Abdominal Aortic Aneurysm	Once between ages 65 and 75 if you have ever smoked
Aspirin Use	Ages 50 – 79 (Talk with your doctor about the benefits and risks of aspirin use.)

\*Recommendations may vary. Discuss screening options with your doctor, especially if you are at increased risk.

### **2024 Children Wellness Guidelines**

#### Children's Health

- Put your children on the path to wellness by scheduling regular office visits with a doctor. In addition to discussing your child's growth and progress, the doctor should:
  - Check your child's body mass index percentile regularly beginning at age 6.
  - Conduct a yearly wellness exam beginning at age 3.
  - Test vision at least once between the ages of 3 and 5.

Routine children's immunization schedule										
Vaccine	Birth	1 month	2 months	4 months	6 months	12 months	15 months	18 months	1.5 – 3 years	4 – 6 years
Hepatitis B (HepB)	•		•		•					
Rotavirus (RV)			•	•	•*					
Diphtheria, Tetanus and Pertussis (DTaP)			•	•	•	•				•
Haemophilus Influenzae Type B (Hib)			•	•	•*	•				
Pneumococcal Conjugate (PCV)			•	•	•	•				
Inactivated Polio Vaccine (IPV)			•	•	•				•	
Influenza (Flu)					<ul> <li>Recommended yearly starting at age 6 months, with two doses given the first year</li> </ul>				S,	
Measles, Mumps and Rubella (MMR)							<sup>†</sup>			•†
Varicella (Chickenpox)							•			•
Hepatitis A (HepA)					<ul> <li>First dose: 12 – 23 months</li> <li>Second dose: 6 – 18 months later</li> </ul>					

•One dose <a>N</a> Range of recommended dates

\*Number of doses needed varies depending on vaccine used. Ask your doctor.  $\dagger$ Measles, mumps and rubella (MMR) vaccine. (Minimum age: 12 months for routine vaccination.) Routine vaccination: two-dose series at 12 – 15 months and 4 – 6 years. The second dose may be given as early as four weeks after the first dose.

# 2024 Children Wellness Guidelines

#### **Tweens and Teenagers**

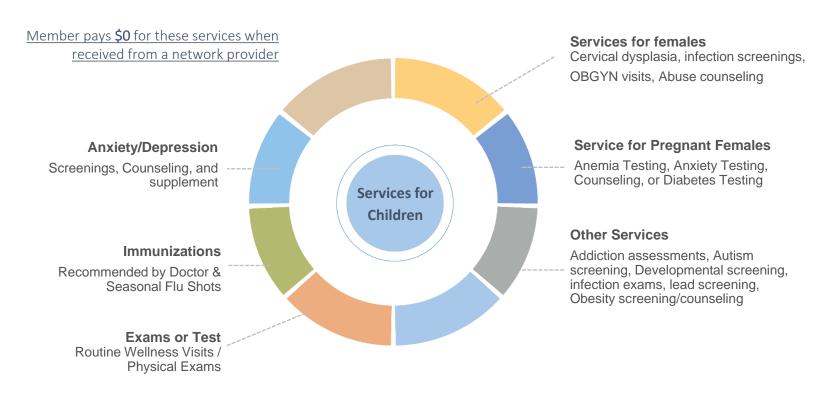

As your child grows into a teen, he or she should continue yearly doctor visits for exams and scheduled immunizations. These visits give the doctor a chance to talk about:

- The importance of good eating habits and regular physical activity
- Avoiding alcohol, smoking and drugs
- The impact of sexual activity and sexually transmitted disease

Recommended immunizations for ages 7 to 18					
Vaccine	7 – 10 years	11 – 12 years	13 – 15 years	16 years	17 – 18 years
Tetanus, Diphtheria and Pertussis (Tdap)		•			
Human Papillomavirus (HPV) – females and males		•			
Meningococcal (MCV)		•		•	
Influenza (Flu)			Yearly		

#### •One dose <a>[</a> Range of recommended dates

\*The Centers for Disease Control and Prevention recommends all 11- to 12-year-olds receive a two-shot series of HPV vaccine at least six months apart. A three-shot series is needed for those with weakened immune systems and those ages 15 or older. Sources: U.S. Department of Health and Human Services, the Centers for Disease Control and Prevention, U.S. Preventive Services Task Force.

### **Employee Resources for Better Wellbeing**

### **COMPANION BENEFIT ALTERNATIVES**

Companion Benefit Alternatives (CBA) manages the behavioral health benefits your health plan provides.

Why CBA? This is our free health coaching program which is designed to help you become more informed about what affects your health. You will also learn ways to improve your health. We will work together to help you reach your personal goals.

#### We can HELP you!

- Recognize your risk factors and identify treatment options
- Explore healthy lifestyle choices (exercise, food choices, tobacco use)
- Complete behavioral health screenings

#### In this program, you will:

- Receive online and mailed customized information about your medications and health issues
- Receive referrals to community and national resources
- Complete behavioral health screenings

What you need to do: As part of your health plan benefits, you also have access to our other health coaching programs. We have programs designed specifically for depression, bipolar disorder, MOMs support, and attention deficit hyperactivity disorder (ADHD), and recovery support.

How to contact us:

Phone: 800-868-1032 ex. 25835 – Health Coaching Staff
