

BRIDGE MATE™ BY MARINE TECHNOLOGIES

BRIDGE MATE AUTOPILOT

The Bridge Mate Autopilot from Marine Technologies (MT) is based on the proven technology common to all Bridge Mate products and shares the same software and hardware platforms used by all MT systems.

BRIDGE MATE AUTOPILOT ADVANTAGES:

- Wheel Mark approved according to latest requirements
- Track-control-steering-approved when integrated with Marine Technologies' conning display and MT Electronic Chart Display and Information System (ECDIS)
- Based on a high performance model (Kalman filter)
- Operated by either a highly-intuitive touchscreen monitor HMI (human-machine interface) or dedicated heading wheel
- Fully integrated with all other Bridge Mate systems, such as dynamic positioning, with no additional hardware required
- Available on all Multi-Function Workstations (MFWs) from MT
